SHIP AUGER BITS

Ship Auger Bits

Key Features

- They drill through up to 2X the nails of competitive auger bits without needing resharpener.
- Drill into clean or nail-embedded wood with confidence when installing Romex wire, PEX water lines, rebar, bolts and rope in piers, playground equipment and landscaping.
- The flutes are wider for maximum chip removal, even in deal holes.
- The polished and coated flute finish means chips won't stick to the bit, even when drilling in material that contains sap or glue.
- The through-center cutting design creates a more solid striking point against nails compared to the competitions' ahead-of-center and behind-center designs.
- The longer shaft length makes it easy to drill deeper or overhead without an extension.
